Research Interests

Compilers, Program Analysis, Programming languages, Software Engineering.

Objective

Designing new program analyses and applications of program analyses have been the heart of my research pursuit. I wish to explore applications that use program analysis techniques to complement techniques for verification, validation, bug finding, etc.

Experience

- **Senior Researcher** in Microsoft Research, India *(Mar '24 - Present)*

- **Post-Doctoral Researcher** in Microsoft Research, India *(Sep '21 - Feb '24)*

- **Research Associate** in Department of Computing, Imperial College, London *(Aug '18 - July '21)*

- **Invited Speaker** at Summer School for Pointer Analysis, IIT Bombay *(July '22)*

- **Teaching Assistant** in CSE Department, IIT Bombay *(Aug '11 - Aug '18)*

- **Teaching Assistant** in Department of Computing, Imperial College *(Oct '19 - Jan '20)*

Education

- **Ph.D.** in Computer Science & Engineering, IIT Bombay *(Jun '13 - July '18)*
  Thesis Title: *Generalized Points-to Graph: A New Abstraction of Memory in Presence of Pointers*
  Advisor: Prof. Uday P. Khedker

- **M.Tech.** in Computer Science & Engineering, IIT Bombay *(July '11 - Jun '13)*

- **B.E.** in Computer Science & Engineering, Mumbai University *(Jun '06 - May '10)*

Publications

- *Inference of Resource Management Specifications.* Narges Shadab, Pritam M. Gharat, Shrey Tiwari, Michael Ernst, Martin Kellogg, Akash Lal, Shuvendu Lahiri, Manu Sridharan. Object Oriented Programming Systems Language and Applications (OOPSLA) 2023.

- *Combining Static Analysis Error Traces with Dynamic Symbolic Execution (Experience Paper).* Frank Busse, Pritam M. Gharat, Cristian Cadar, Alastair Donaldson. ACM SIGSOFT International Symposium on Software Testing and Analysis (ISSTA) 2022.

- *Generalized Points-to Graph: A New Abstraction of Memory in Presence of Pointers.* Pritam M. Gharat, Uday P. Khedker, Alan Mycroft. ACM Transactions on Programming Languages and Systems (TOPLAS) 2020.

- *Flow- and Context-Sensitive Points-to Analysis using Generalized Points-to Graphs.* Pritam M. Gharat, Uday P. Khedker, Alan Mycroft. 23rd Static Analysis Symposium (SAS) 2016.

- *CoS-SSA: SSA for Context-Sensitive Interprocedural Analysis.* Pritam M. Gharat, Uday P. Khedker, Alan Mycroft – Under review.

- *Excursions in Pointer Analysis.* Uday P. Khedker, Pritam M. Gharat – Book under preparation.

Projects

- **Inference of Resource Management Specifications**
  (In Collaboration With Narges Shadab (UCR), Manu Sridharan (UCR), Michael Ernst (UW), Martin Kellogg (NJIT), Shrey Tiwari (MSR), Akash Lal (MSR), Shuvendu Lahiri (MSR) (Sep. '21 - July '23))

- ○ Developed an annotation-based modular resource leak checker in CodeQL for C# code.
- ○ Designed a fixed-point algorithm for automatic inference of annotations for the analysis.
- ○ This work was published in OOPSLA 2023.

- **Combining Static Analysis Error Traces with Dynamic Symbolic Execution**
  (In Collaboration With Frank Busse, Cristian Cadar, Alistair Donaldson at Imperial College (May '19 - July '21))

  - ○ The goal of this work was efficient detection of bugs by combining static analysis and dynamic symbolic execution.
  - ○ Worked on Clang Static Analyzer and Infer (static analyzers) and KLEE (dynamic symbolic execution tool).
  - ○ Customized the search strategy of KLEE to explore only paths that agree with the static information, effectively detecting the bugs faster.
  - ○ This work was published in ISSTA 2022.

- **Generalized Points-to Graph: A New Abstraction of Memory in Presence of Pointers**
  (Ph.D. Thesis under the guidance of Prof. Uday Khedker at IIT Bombay, Jun '13 - July '18)

  - ○ Designed and developed a summary-based flow- and context-sensitive pointer analysis in GCC.
  - ○ Introduced the concept of Generalized Points-to Graph (GPG) as a new representation of a compact and yet precise procedure summary for scalable pointer analysis.
  - ○ The implementation for GPG-based pointer analysis scaled to 158kLoC for C programs.
  - ○ This work was published in SAS 2016 and TOPLAS 2020.

- **CoS-SSA: Context-Sensitive Interprocedural SSA**
  (In Collaboration with Prof. Uday Khedker and Prof. Alan Mycroft (University of Cambridge) (Sep '21 - Present))

  - ○ Proposing an interprocedural SSA form, called the *context-sensitive SSA* (aka CoS-SSA), that overcomes the limitations of traditional intraprocedural SSA by constructing SSA variables for scalars and pointers that may be global or address-taken local.
  - ○ The way traditional SSA brings in flow sensitivity for free for program analysis, CoS-SSA brings both flow and context sensitivity for free for program analysis.

- **Improving Interprocedural Analysis**
  (M.Tech + Ph.D. Dual Degree Research Proposal, guided by Prof. Uday Khedker, Oct '12 - Dec '12)

  - ○ Reforming Value Based Call Strings Method by eliminating the re-processing of flow functions and improving the efficiency.
  - ○ Proposed a variant to k-CFA called as Var-k-CFA for higher order languages by building an analogy between Var-k-CFA and Value Based Call Strings Method.

Honours and Distinctions

- TCS Research Fellowship *(July '13 - July '18)*.

- Sir Ratan Tata Trust Merit scholarship for two consecutive years - *2008* and *2009* for excellence in academics.

- Best Student Award from Tata Consultancy Services *(2010)*.

- Ranked 82 in Gate 2011.

Service

- ISEC 2024 (Program committee)

- CAV 2023 (Artifact evaluation)

- ISSTA 2021 (Artifact evaluation)

- SAS 2020 (Artifact evaluation)

- TACAS 2024 (Artifact evaluation)

- CGO 2021 (Artifact evaluation)

- PLDI 2020 (External review committee)
